

To complement our existing range of stylish, contemporary steel stoves we are pleased to announce the launch of the LogFire **LF5 Defra** approved Cast Iron stove.

In keeping with the impressive LogFire range the LF5 Defra boasts a large viewing window courtesy of the oversized glass panel, a Hearth temperature of just 43 Deg C and sleek contemporary twists such as the stainless-steel door handle and primary air control. All of which are not usually found on more traditional Cast Iron stoves.

Manufactured in Black as standard but with an additional option of choosing any of the 33 colours available throughout the LogFire range.

Certified to sit on a 12mm Hearth this unique mix of tradition and contemporary design will compliment any room setting.
